Food Tools for Life

QUALITY = Sustainability

Our collection consists of products that are primarily made of natural raw materials like stone, steel and wood. Since using these materials has an environmental impact, we make the most of our natural resources by creating products that last a lifetime.

BOSKA Food Tools are designed to be smart and tough tools that maintain their beauty and quality throughout their lifespan. We promise quality and make every effort to offer a lifelong guarantee. We also want to have a positive impact by making products affordable to as many people as possible.

PROUD to be B Corp™

BOSKA has been a certified B Corp™ company since 2022. This certification shows that BOSKA prioritizes people, the environment and society. Together we aim to have a positive impact on the world around us. B Corp™ is one of the most respected certifications with respect to sustainability.

Becoming a B Corp™ is just the beginning because, as a company, we work hard every day to help make positive, lasting changes. Each and every day, we endeavor to improve ourselves, which is why this philosophy is reflected in everything we do, from our employment policy to the initiatives we join that contribute to a sustainable society.

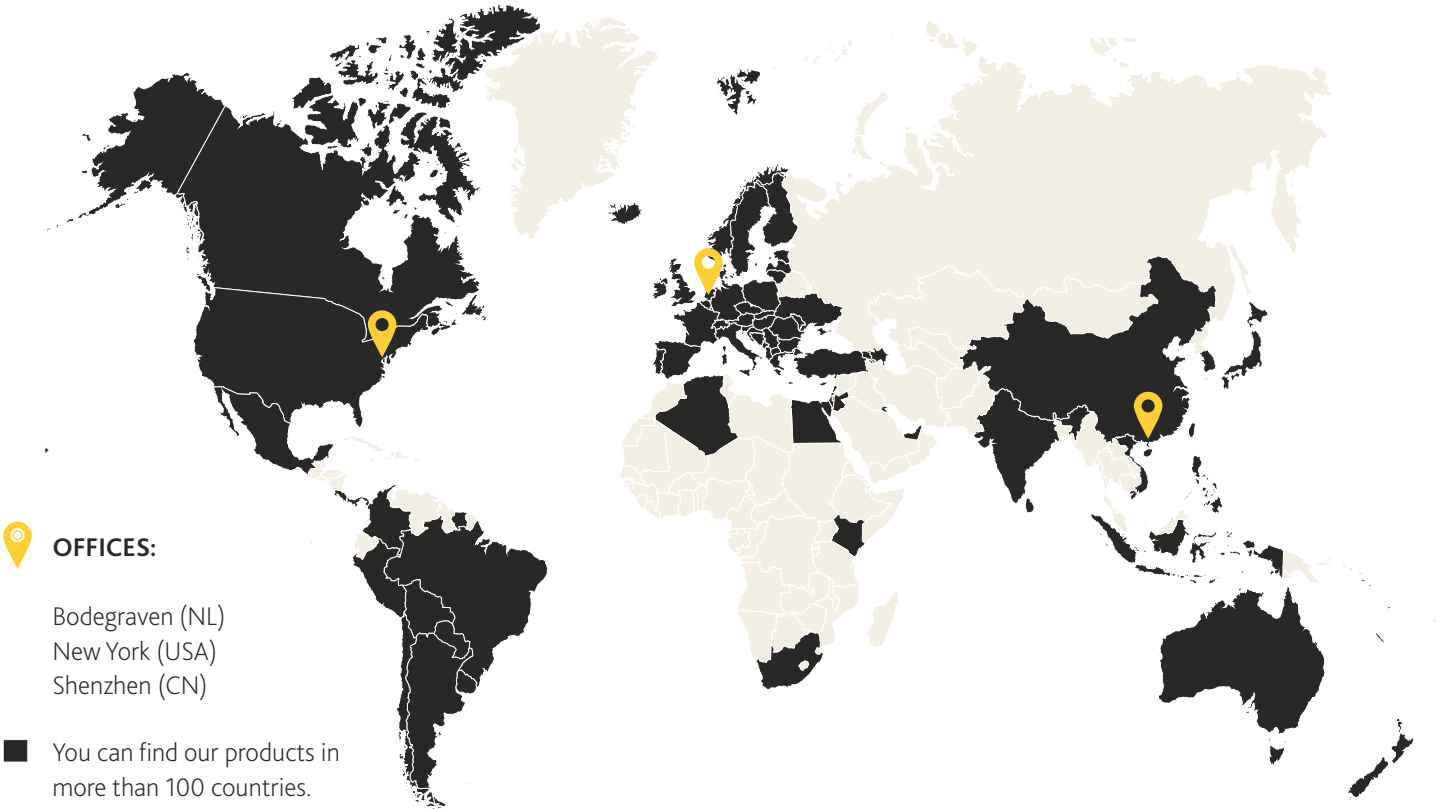

We are a certified **PURVEYOR** to the **ROYAL** household

"By appointment to the court of the Netherlands" is an honorary title awarded by the king to small and medium-sized businesses that occupy a very important position in the region.

OUR IMPACT

DESIGNED TO MAKE A DIFFERENCE

At **BOSKA**, we believe in making food fun — but never at the planet's expense. Every product we create is designed to bring people together, spark joy, and leave the world just a little better than we found it.

Built to last (like, really last)

You know that feeling when something just works? That's what we're after. We make tools that don't just survive your dinner parties, but your grandkids' too. Durable, repairable, timeless — because throwing things away is so last season.

Less waste, more taste

From slicing to serving, we think a lot about what happens before and after the moment you unwrap a **BOSKA** product. That's why we keep packaging minimal and materials honest — think recycled cardboard, FSC®-certified wood, and stainless steel that actually stays stainless

Doing business the decent way

We work with people, not faceless factories. Real relationships, fair working conditions, and transparency matter to us. Because behind every product is a chain of humans — and we want them all to feel proud of what they've made.

Small changes, big results

No, we're not perfect. But every year, we challenge ourselves to do better. Smarter shipping, greener choices, fewer emissions. Not just because it's trendy — but because it's the right thing to do.

Join our table

When you buy **BOSKA**, you're not just getting a great cheese tool. You're joining a movement of people who care — about quality, about fun, about the future. So grab that slicer, pop open the wine, and let's keep making impact together.

We support Justdiggit to compensate the CO2 emissions we can not offset yet.
